UPC:

- Brushed Chrome - 710244277143
- Black - 710244277174
- Red - 710244277150

CR712 AutoRama CD

Bet you didn't know that Powel Crosley was the first to build a production model sports car in the US. Yes, he's not only the genius who brought us mass produced radios, appliances, and of course WLW – The Nation's Station, but he also became famous for his Crosley automobiles. The Autorama CD represents a vintage icon mimicking the clean, streamlined stylings of a classic 1950's automobile. From the sleek lines to the chrome grill side mounted speakers, this beauty takes you back to the days of drive-ins and diners, but adds a hint of technological advance with a CD player. Crosley's fascination with automobiles is evident right down to the last exacting detail. The Autorama CD features an AM/FM Radio, a 3 speed turntable, a compact disc player and enough sophistication to render most enthusiasts speechless.

CROSLLEY
