

General Tub Deck Mounted Telephone Faucet Installation Instructions

Please Note: We are providing general guidelines for a standard installation as we cannot account for the individuality of the site or items you may be working with.

Tools Layout:

1. The most important tool to use when installing a faucet and supply lines is a licensed plumber. Most manufacturers will not accept warranty claims on items not installed by a licensed plumber.

2. [1/2" Tubing cutter](#)

3. [Strap wrench](#)

4. [Smooth jawed pipe wrench](#)

5. [Thread Sealant](#) (Teflon tape or liquid form) - Liquid thread sealant should not be used for installation on supercoated brass. If used, the item will not be covered under the manufacturer's warranty. The manufacturer recommends using teflon tape on the threaded connections.

6. [Tape Measurer](#)

Instructions:

1. Apply a liberal amount of thread sealant to the short end of the faucet nipple. (Use teflon tape instead of thread sealant if the finish is supercoated brass).

2. Tighten the faucet nipple to the 1/2" thread on the deck mount coupler. You want to hand tighten a 1/4 turn using the strap wrench.

3. Repeat on the opposite side.
4. Place deck mount coupler with nipple through the faucet hole.
5. Apply the jam washer and the jam nut to the back of the faucet nipples. (Do not tighten yet).

6. Repeat on the opposite side.

7. Take the lock nut washer and install in the lock nut to attach the modified swing arm to the deck mount coupler.

8. Tighten the lock nut to the swing arm. Hand-tighten a 1/4 turn using strap wrench.

9. Repeat on the opposite side.

10. Hand tighten the lock nuts to the faucet body.

11. Apply the smooth jawed pipe wrench to the lock nut and tighten a 1/4 turn.

12. Use your sight to center the faucet the best you can.

13. Use the smooth jawed pipe wrench to tighten the jam nut connections at the faucet and deck mount couplers.

14. To attach the handshower holder, attach the washer to the lock nut.

15. Attach the lock nut to the faucet body.

16. Use the smooth jawed pipe wrench to tighten lock nut. Turn until tight.

17. Attach the shower hose lock nut to the arm.

18. Use the strap wrench to tighten the hose lock nut.

19. Place handshower on the holder.

20. You may have extra parts as shown.
