

2 USA & CANADA INSTALL

The ABS female adapter features a hub x female NPT thread connection and provides a means for adapting a solvent weld connection to a threaded connection

Lullaby™ Aquastone™ Bathtub

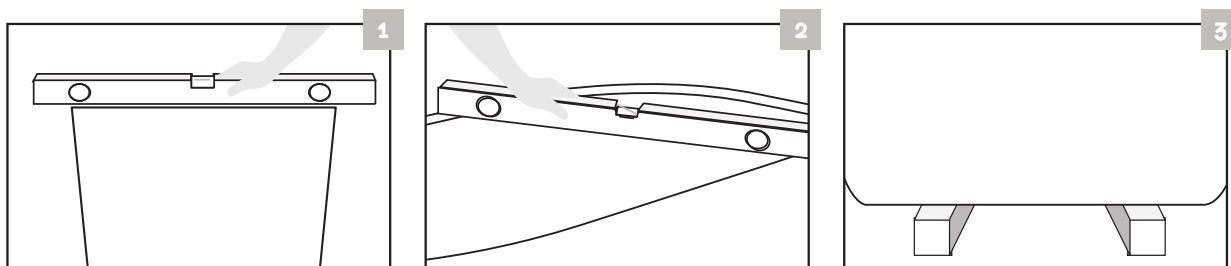

TYPICAL FREESTANDING BATHTUB INSTALLATION PROCEDURE

Before you start:

- Ensure that the floor is even.
- The water-overflow fitting is supplied with the product, however other accessories like the slip joint and adaptors are not included and must be purchased separately.
- Because of the technical features of the product, it should be used only with the supplied waste-overflow or specific 3rd party models that have been tested and approved by us.
- Place the bathtub by raising it up 4" with 4x4 pieces of lumber so you can have access from the bottom of the bathtub.
- The bath must rest on its feet, not the monobloc sides. The feet must be adjusted to compensate for any floor imperfections and leave minimal gap with floor.

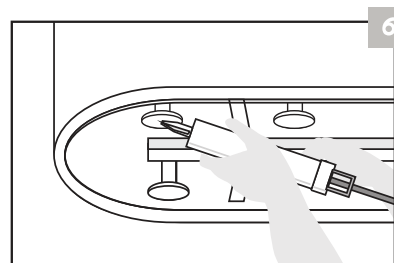

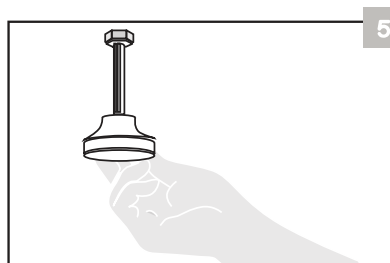

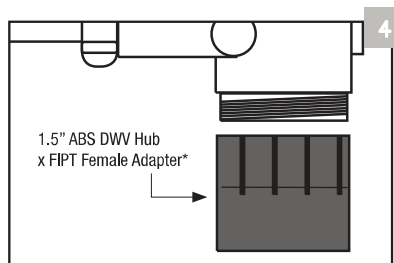

INSTALLATION SEQUENCE

- The Lullaby™ bathtub is equipped with factory pre-installed overflow system.
- The waste pipe/p-trap connection must be made directly to the waste/drain outlet located at the bottom of the tub.

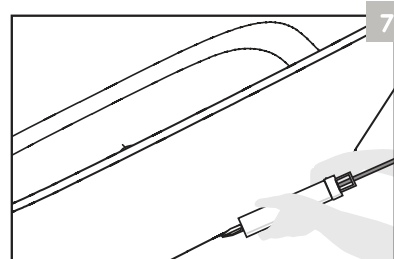

- **Picture 1-2:** the bathtub is leveled via a water level at the intended local installation area.
- **Picture 3:** place the bathtub by raising it up 4" with 4x4 pieces of lumber so you can have access from the bottom of the bathtub. **Important note:** during the installation, the bathtub should not be turned on its side to prevent its weight from deflecting its monobloc sides. This is why it is important to use supports to raise the bathtub above the floor. This will also provide you with easy access to the internal plumbing parts.

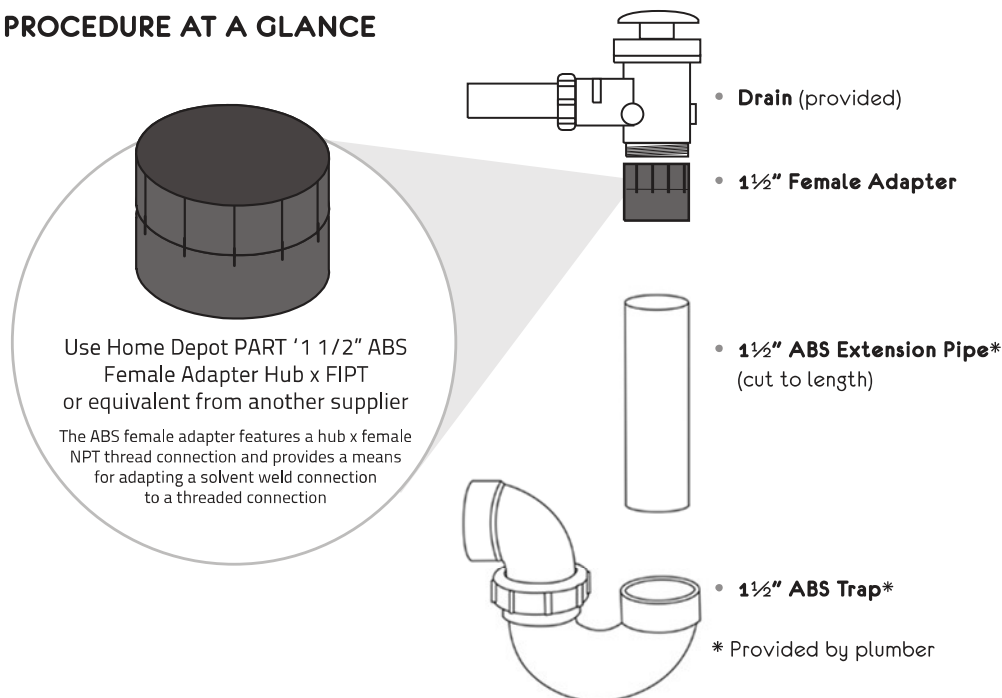

- **Picture 4:** the water outlet pipe should be connected.
- **Picture 5:** foot leveling lock nuts are adjusted.
- **Picture 6:** silicone is applied to the feet of the bathtub that stands on the floor.
- **Picture 7:** when the installation is completed, the bathtub is taken down from the supports (ie 2 x 4's).

If necessary, installation is completed by applying silicone at several points between the bottom panel and floor

* The ABS female adapter features a hub x female NPT thread connection and provides a means for adapting a solvent weld connection to a threaded connection

INSTALLATION PROCEDURE AT A GLANCE

Compatible adaptors for adapting a threaded male connection to a solvent weld connection:

- Mueller Industries: Part # 05913

Or

- Nibco: C4803

<http://www.homedepot.com/p/NIBCO-1-1-2-in-PVC-DWV-Hub-x-FIPT-Female-Adapter-C4803HD112/100677994>

The adaptor must have the appropriate thread type or it will keep slipping and you will not be able to get a tight connection!
