

TUB FAUCET INSTALLATION GUIDE

BEFORE YOU BEGIN

- 1) Shut off water supply.
- 2) Carefully inspect waste and supply tubing for signs of damage.
- 3) Replace waste or supply tubing if necessary

INSTRUCTIONS

- 1) Apply tape or putty to both ends of hot and cold supply nipples. Thread the nipples into risers.
- 2) Attach the rubber washer into riser nut, connect it with faucet body.
- 3) Attach the rubber washer into cradle nut, connect it with faucet body elbow.
- 4) Set the faucet onto tub and nipples go through the tub wall holes.
- 5) Slid the metal washer and install the lock nut then tighten with wrench.
- 6) Set the handles on faucet body with screws.
- 7) Assemble the hand shower and hose with rubber washer, then to connect with cradle.
- 8) Connect the water supply lines to riser nipples.
- 9) Turn on main water supply and check all connections for leaking.

COMPLETE INSTALLATION

Note: All nuts connections, hand tighten first then quarter turn tighten by wrench. Don't over tighten the nut.
