

WALL-MOUNT SHOWER SYSTEM INSTALLATION

BEFORE YOU BEGIN:

We recommend consulting a professional if you are unfamiliar with installing plumbing fixtures. We accept no liability for any damage to the faucet, plumbing, sink, counter top, to personal injury during the installation.

CAUTION:

Always turn water OFF before removing existing or disassembling the faucet. Open faucet handles to relieve water pressure and ensure that complete water shut-off has been accomplished.

HELPFUL TOOLS:

Teflon Tape

Adjustable Wrench

Level

Thread Sealant

Pencil or Marker

Drill

NOTICE:

1. Shut off the main water supply where the new faucet is being installed.
2. For these instructions, it is assumed the floor has been finished and the water supply has been prepared.

INSTALLATION:

1. Place the escutcheons on the elbows. Wrap the elbows with teflon tape, and thread the connectors onto the supply pipes. Attach the faucet body to the elbows tighten with your adjustable wrench.

2. Attach the connecting rod to the middle shower riser. Attach the shower riser to the shower body. Use a level to measure that shower riser is in the proper location. Hold the mounting bracket in place in the desired mounting location, and mark the location on the wall.

3. Remove the shower riser, and drill two holes at the marked locations. Insert the wall anchors. Attach the mounting bracket to the wall with mounting screws. Attach the escutcheon to the mounting bracket.

WALL-MOUNT SHOWER SYSTEM INSTALLATION

4. Attach the shower support and the middle shower riser. Connect the bottom of the riser to the shower body and the top of the riser to the mounting bracket. Tighten the screws to secure.

5. Thread the shower head onto the shower support. Tighten the locking nut and shower head to secure.

6. Connect the hand shower and shower hose.

CARE and CLEANING:

- Use a mild and soft detergent such as warm water for cleaning. Do not use abrasive cleaners that may scratch or dull the faucet vibrant surface.
- Do not allow cleaner to sit or soak on the surface or the spot will be appeared after a while.
- Clean and rinse with water immediately after cleaner application.
- Use a soft sponge or cloth. Do not use an abrasive material such as blush or scouring pad to clean the faucet surface.
