

Mounting the China series wall-mount sinks

The China series wall-mount sinks are designed to be mounted, directly to the wall *without* using a mounting bracket, like any other wall mount sink it must be mounted into something sturdy “brick or 2x4” never just sheet rock.

- 1) Choose location where sink is to be mounted.
- 2) Make sure sink is level.
- 3) Mark mounting holes location.
- 4) Drill pilot holes.
- 5) Bolt to wall using LAG bolts, stainless steel washers and rubber washers.

(NOTE: To avoid cracking do not over tighten!!!!)

Example of mounting holes
