

Model # 5160

INSTRUCTIONS

1. Attach the S-Union to the tub or wall with flat metal washer and 1/2" lock nut. Make sure that the escutcheon is tight against S-Union arm (hand tighten only).

2. Attach faucet to S-Unions (3/4" rubber washers must be installed) and adjust faucet so that it sits level. Now tighten faucet nuts and then 1/2" lock nuts on the back of the S-Unions. (Use a cloth between the wrench and any finished part of the faucet to prevent any damage)

3. Next connect the water supply lines. Must have hot going to hot side & cold to the cold side. If using 1/2" OD decorative supply line connect the hex nuts at the top of the supply lines to the back of the S-Unions. If installing inside the wall use copper fittings.

4. Attach diverter mechanism to the top of the faucet body using 1/2" to 3/4" adaptor supplied. Slide the hand shower cradle on to the lower portion of the riser tube. Attach lower portion of the riser tube to the add on diverter device.

5. Next slide the wall support ring on to the upper portion of the riser and attach to bottom tube. Make sure that the rubber gasket is inside the coupling nut and position the curve part of tube such that it is facing down in tub. Adjust wall support ring to desired height and tighten set screw. Attach wall rod (cut non-threaded end for desired length). Shower riser tube should be parallel to the wall.

CARE AND MAINTENANCE

Minimum Maintenance is required to maintain product finish. With proper maintenance your CHEVIOT Faucet will continually look like new. Special care should be taken when cleaning your faucet and the following suggestions should help extend your faucet life.

- Cleaning should be done regularly using a soft cotton cloth and warm water, then towel dry.
- Do not use cleaners that contain abrasives or harsh chemicals; Care should be taken in selecting cleaning supplies. Many cleaners contain detergents, ammonia, or other corrosive solvents that could damage your faucet finish.
- occasionally clean with a non-abrasive wax polish.

Model # 5160

INSTRUCTIONS

6. Adjust hand shower cradle to desired height and tighten by hex wrench supplied.
7. Attached shower hose and hand shower to diverter mechanism.
8. Once installed, remove aerator and flush faucet and lines. This will remove any debris that may be trapped. Then attach shower head and aerator.

Backflow prevention device
