

AQUATICA INNOVATION SERIES BATH DRAINS

Scarico per vasca in polipropilene
con troppo pieno nascosto
Tubo semirigido in polipropilene Ø 34 mm
Movimento UP & DOWN

Polypropylene pop up bath tub waste
with hidden overflow.
Ø 34 mm semi-rigid pipe.
Up&Down mechanism.

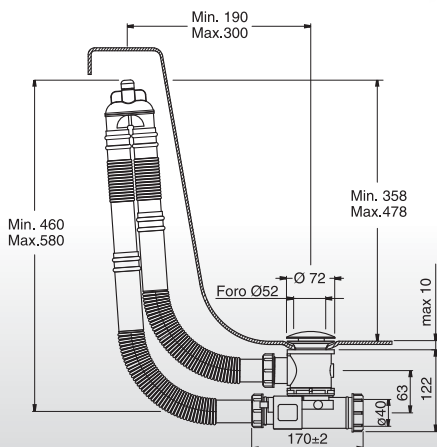

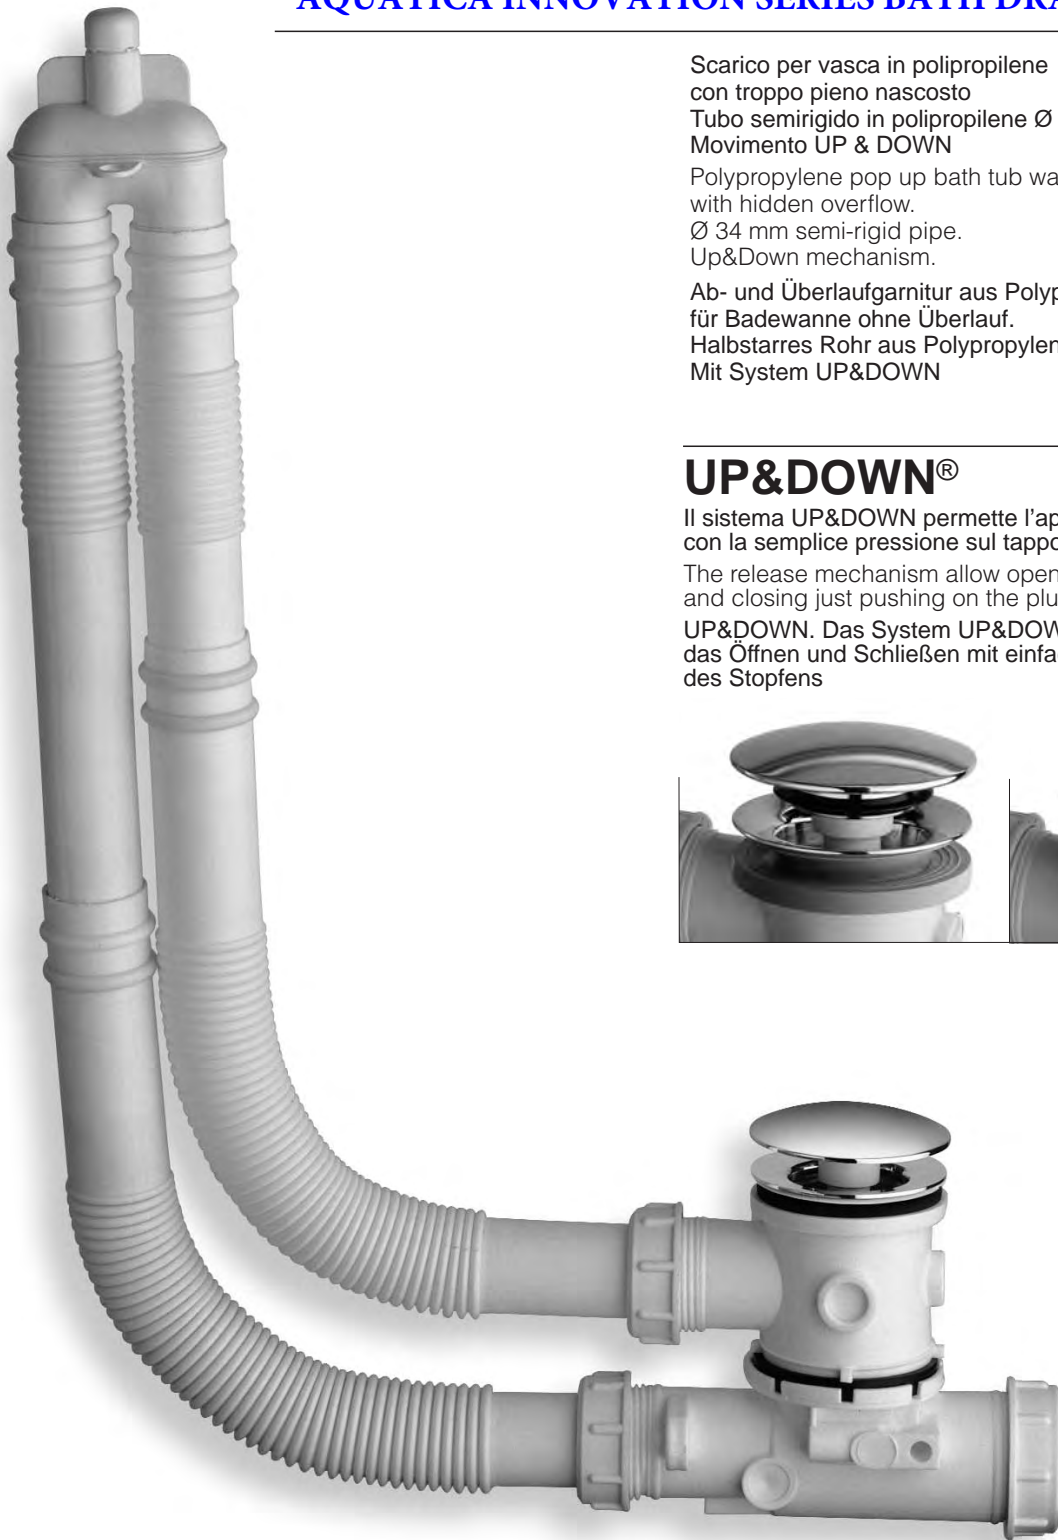

Ab- und Überlaufgarnitur aus Polypropylen
für Badewanne ohne Überlauf.
Halbstarres Rohr aus Polypropylen Ø 34 mm.
Mit System UP&DOWN

UP&DOWN®

Il sistema UP&DOWN permette l'apertura e la chiusura
con la semplice pressione sul tappo

The release mechanism allow opening
and closing just pushing on the plug

UP&DOWN. Das System UP&DOWN ermöglicht
das Öffnen und Schließen mit einfacher Betätigung
des Stopfens

Hidden overflow system

Aquatica's Concealed Waste-Overflow System is based on the scientific principle of equal water levels in communicating vessels.

How it works

The Concealed Waste-Overflow System from Aquatica is a combined hidden overflow, waste and plug system. Instead of a traditional overflow hole, hidden behind the bath is a twin pipe overflow that is connected direct to the waste. When you fill the bath with water - one side of the overflow pipe fills -exactly to the same level as the bath. If you overfill the bath - the water in one side of the overflow pipe will filter up and over the bend down the other side of the overflow pipe, directly into the waste system.
